## Anti-mClover

**Source:** Goat

**General description:** Goat polyclonal antibody to mClover (Clover fluorescent protein). mClover is a basic (constitutively fluorescent), monomeric engineered derivate of green fluorescent protein (GFP) isolated from Aequorea victoria. mClover is a ~27 kDa protein that is optimally excited at a 506 nm and has a maximum of emission at 518 nm. It is used in research as a reporter to label and study the biology of the cell using a wide range of applications.

**Alternative names:** green fluorescent protein antibody.

**Form:** Polyclonal antibody supplied as a 100 µl (3 mg/ml) aliquot in PBS, 20% glycerol and 0.05% sodium azide. This antibody is epitope-affinity purified from goat antiserum.

**Immunogen:** Purified recombinant fluorescent protein produced in E. coli.

**Specificity:** In 293HEK cells transfected with cds plasmid detects a band of 27 kDa by Western blot. This antibody does not recognize RFP (red fluorescent protein).

**Reactivity:** Reacts with Transfected cells proteins

| Sample | WB | IHC (F) | IHC (P) | IF | ELISA | IEM |
|---|---|---|---|---|---|---|
| Transfected cells | +++ | +++ | +++ | +++ | ND | +++ |

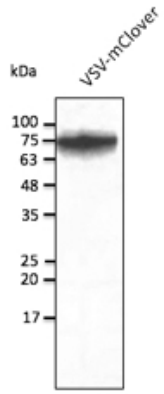

+++ excellent, ++ good, + poor, ND not determined

**Usage:**

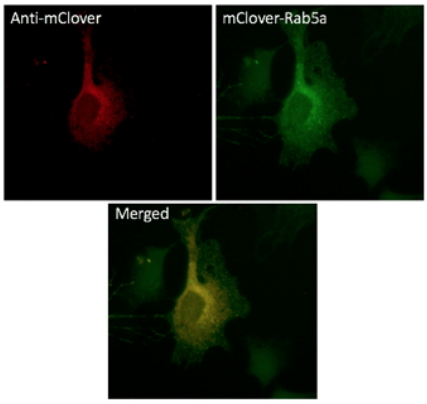

| | |
|---|---|
| WB: | 1:500-1:5,000 |
| IHC (F): | 1:50-1:500 |
| IHC (P): | 1:50-1:500 |
| IF: | 1:50-1:500 |
| IEM: | 1:50-1:500 |

**Storage:** For continuous use, store at 2-8 C for one-two days. For extended storage, store in -20 C freezer. Working dilution samples should be discarded if not used within 12 hours.

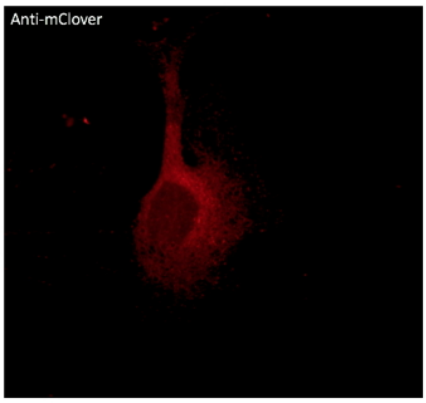

**Special instructions:** The antibody solution should be gently mixed before use..

Anti-mClover Ab at 1/2,500 dilution using HEK293 transfected cell lysates at 50 µg per lane; rabbit polyclonal to goat IgG (HRP) at 1/10,000 dilution;

Immunofluorescence – anti-mClover Ab using NIH3T3 cells transduced with mClover-Rab5a; cells were fixed with methanol and anti-mClover at 1/250;

Immunofluorescence – anti-mClover Ab using NIH3T3 cells transduced with mClover-Rab5a; cells were fixed with methanol and anti-mClover at 1/250;

For research use only, not for diagnostic use

**SICGEN's Proprietary Immunogen Policy**

In order to produce high specific antibodies SICGEN has invested a lot of time and effort into selecting immunogen sequences. SICGEN has decided to protect this information by not publishing it on the website. However, these sequences are available on request.
