## Anti-Cre

**Source:** Goat

**General description:** Goat polyclonal antibody to Cre recombinase. Cre recombinase is a tyrosine recombinase enzyme derived from the P1 bacteriophage. The enzyme (38 kDa) is a member of the Integrase family of site specific recombinase and it is known to catalyse the site specific recombination event between two DNA recognition sites (loxP sites).

**Alternative names:** Cyclization recombinase antibody.

**Form:** Polyclonal antibody supplied as a 200 or 500 μl (3 mg/ml) aliquot in PBS, 20% glycerol and 0.05% sodium azide. This antibody is epitope-affinity purified from goat antiserum.

**Immunogen:** Purified recombinant peptide produced in E. coli.

**Specificity:** In 293HEK cells transduced with Ad-Cre detects a band of 38 kDa by Western blot and gives a positive signal for the Cre recombinase protein.

**Reactivity:** Reacts with Transfected cells proteins

Sample	WB	IHC (F)	IHC (P)	IF	ELISA
Transfected cells	+++	ND	ND	ND	ND

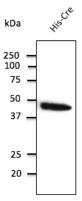

+++ excellent, ++ good, + poor, ND not determined

**Usage:** 

WB: 1:500-1:2,000

**Storage:** For continuous use, store at 2-8 C for one-two days. For extended storage, store in -20 C freezer. Working dilution samples should be discarded if not used within 12 hours.

**Special instructions:** The antibody solution should be gently mixed before use..

Anti-Cre Ab at 2,000 dilution; rabbit polyclonal to goat IgG (HRP) at 1/10,000 dilution;

## For research use only, not for diagnostic use

## SICGEN's Proprietary Immunogen Policy

In order to produce high specific antibodies SICGEN has invested a lot of time and effort into selecting immunogen sequences. SICGEN has decided to protect this information by not publishing it on the website. However, these sequences are available on request.
